A conical shape

A conical shape

The CONE door handle, inspired by the handle on a safe, is characterized by its elegance and timeless aesthetic. The neck of the door handle is tapered, resulting in its characteristic conical shape. The rosette-less design also creates the allusion of a floating door handle. The door handle is manufactured as one piece, making it a technical masterpiece, especially with the extremely high-standard finish applied. The seamless design imbues a space with a sense of tranquillity while substantially enhancing the overall aesthetics.

Een conische vorm

De op de greep van een kluis geïnspireerde CONE deurkruk kenmerkt zich door haar statige en tijdloze karakter. De nek loopt smal toe waardoor er een karakteristieke kegelvorm ontstaat en door de rozetloze uitvoering van de deurkruk lijkt het alsof deze op de deur zweeft. Het sublieme afwerkingsniveau van de uit één stuk gefabriceerd deurkruk is verbluffend en getuigt van technische precisie. De naadloze vorm geeft rust, maar levert toch een wezenlijke bijdrage aan een mooier interieur.

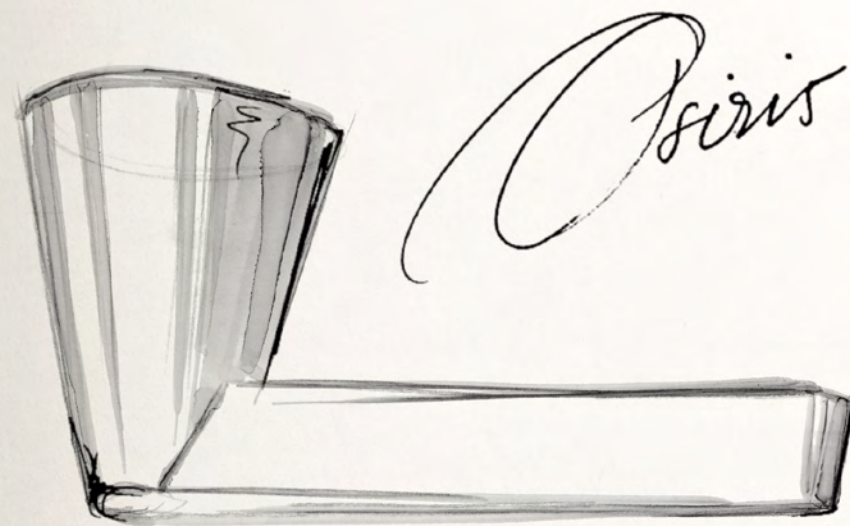

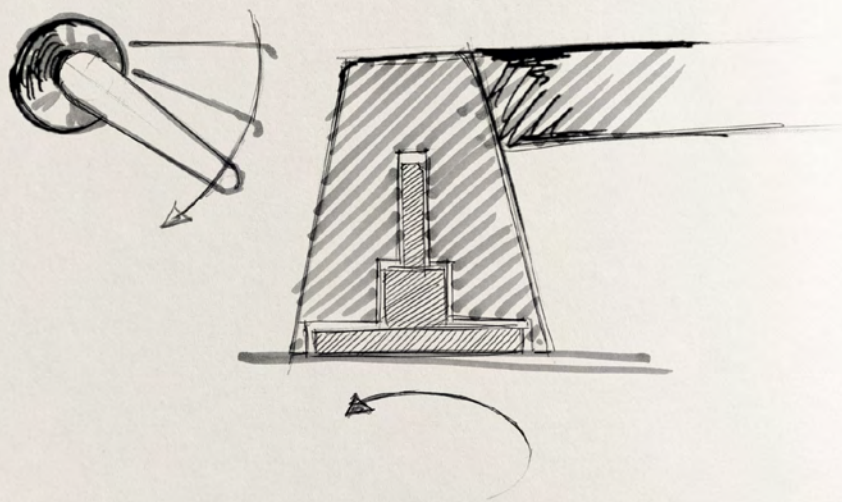

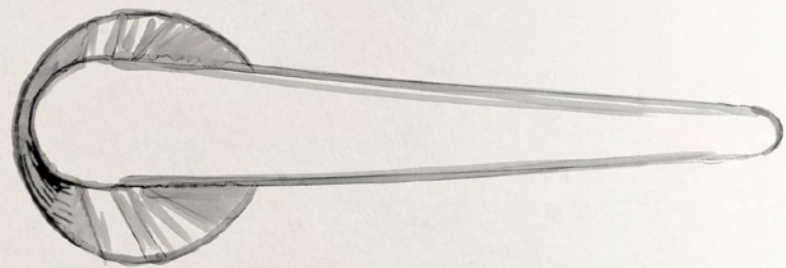

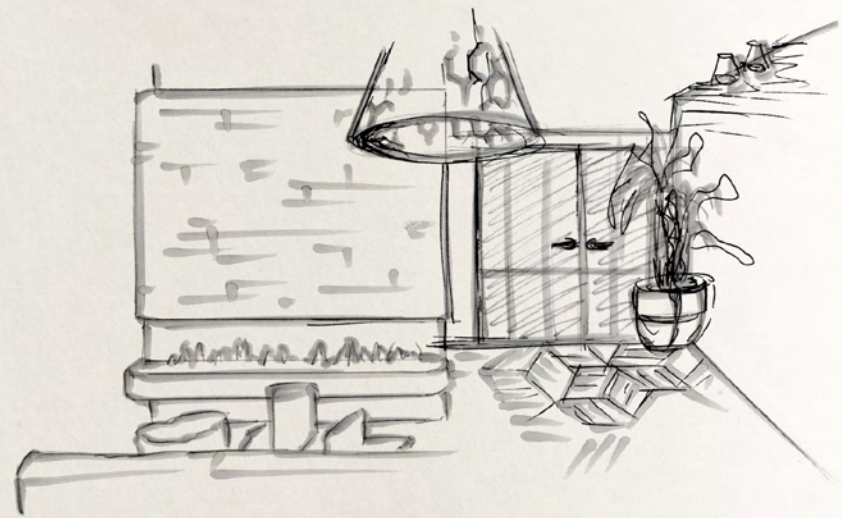

Osiris Hertman

A door handle is like a jewel, always visible in your home. We have opted for a clear and sturdy design, a conical shape. The technology is hidden in the cone section so that no rosette is needed.

Tilburg, the Netherlands

Design Philosophy: I like to incorporate the landscape in my interiors; the influence of nature is essential. Basically, you can learn everything through nature: the warmth of clothing, the softness that is concealed within hard materials, the flexibility of things, the cohesion. Because that is what really counts where interiors are concerned: that every last thing harmonises with everything else.
